

Antimicrobial

QUALICA-RD

✓ 100% Antimicrobial open rigid cardholder

Our rigid cardholders are available in **16 different colors**, **100% antimicrobial and fully recyclable**. Transparent, Black, Red, Dark Blue, Light Blue, Royal Blue. Orange, dark green, white, purple, gray, pink, light green, navy blue, NHS blue and yellow.

TECHNICAL SPECIFICATIONS

Material	Polypropylene and Biomaster
Suitable for food contact	Yes
BPA free	Yes
Storage	Store below 120 degrees
Manufacture in	Europe
Package units	100 per package
Package dimensions	21.5cm (L) x 19cm (W) x 7cm (H)
Recyclable	100% recyclable backing and packaging
Warranty	2 years
Weight	697 grams

ADDITIONAL INFORMATION: Our antimicrobial carriers, manufactured in Europe, are fully recyclable and can be disposed of in the plastic container or sent to us for closed-loop recycling. They contain the **Biomaster** additive, which makes them antimicrobial and prevents the bacterial cell from growing, as it adheres to the cell wall.

1. Biomaster ions prevent the bacterial cell from producing energy.
2. The cell's DNA is disrupted by the Biomaster reaction mass of silver chloride and titanium dioxide.
3. Because Biomaster uses three ways to prevent bacterial growth, it is much more potent and effective than common disinfectants and other antimicrobial agents.
