

Detectable

✓ Open rigid card holder 100% Detectable

1 color available: Blue. They contain the Biomaster additive, which makes them antimicrobial and prevents the bacterial cell from growing, as it adheres to the cell wall.

*Detectable card holders are perfect for workplaces that require detectable equipment. During production, an ultra-fine steel powder is mixed with the plastic. In this way, the card holder can be detected by both metal detectors and X-rays. They are also antimicrobial for added protection. Ideal for use in the food industry.

TECHNICAL SPECIFICATIONS

Material	Polypropylene, stainless steel
Suitable for food contact	Yes
BPA free	Yes
Storage	Store below 120 degrees
Manufacture in	Europe
Package units	100 per package
Package dimensions	21,5cm (L) x 19cm (W) x 7cm (H)
Recyclable	100% packaging
Warranty	2 years
Weight	697 grams

ADDITIONAL INFORMATION: Our metal detectable cardholders have a much higher percentage of stainless steel included in the cardholder to create a more easily detectable cardholder.

Our Qualica-RD cardholders have been tested by leading food processing factories to achieve this. 100% recyclable packaging.
