SOFTWARE MODULES

Qualica-RD QRDTIME is a modular web application
for the management of time & attendance control,
human resources, access control, visits and staff shifts.

QUALICA-RD
AUTOMATIC IDENTIFICATION SYSTEMS

Time & Attendance

Interface to consult data, manage vacations, leaves, incidents and email alerts, complying with current agreements. Allows to load and modify external schedules.
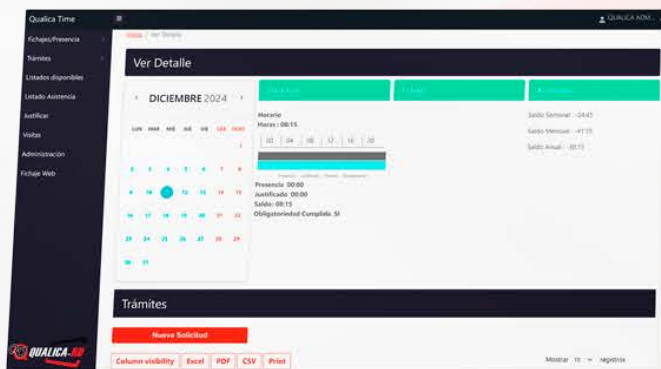

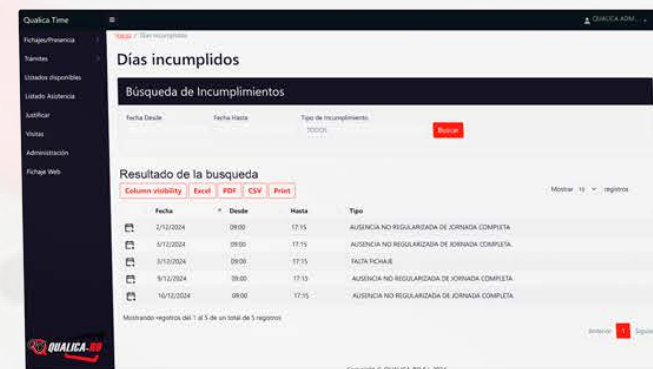

Access Control

Access control system with various verification methods, allowing unlimited access roles, delimitations by time slots and terminals.
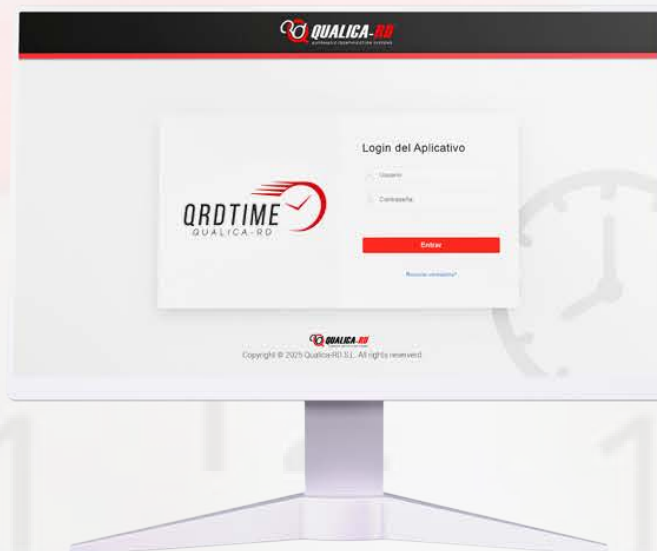

Human Resources

The system optimizes time with automatic validation, alerts, geo-restricted access and integration with LDAP and Azure AD.

ONLINE SIGNINGS

✓ QRDTIME supports **mobile and PC-based signings** incorporating geolocation functionalities.

✓ In addition, it includes a **web portal for employees** to consult, manage requests and upload documentation.

✓ Online clocking allows for restriction by IP, location or device, and **for queries, requests, balances and time worked per user.**

AUTOMATIC IDENTIFICATION SYSTEMS
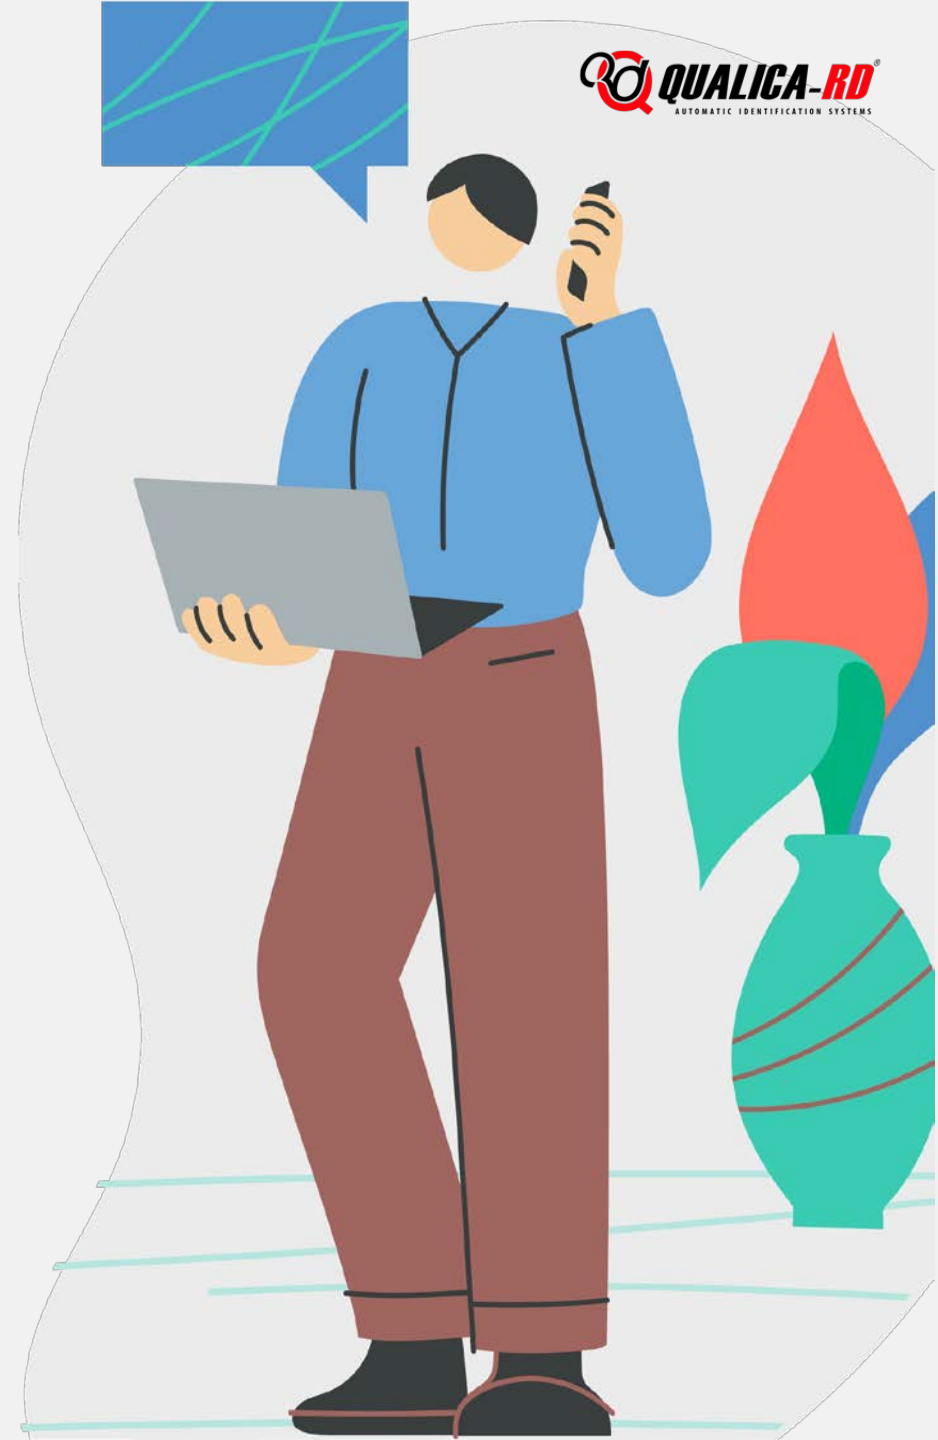

MULTI-ENTITY SYSTEM

✔ QRDTIME allows you to manage **multiple companies** or organizations in a single system.

✔ It offers flexible or rigid **shift design,** cyclic scheduling, permissions by location or user type and a portal with specific menus for roles such as validator, **authorizer and administrator.**

✔ In addition, it **allows validation of requests and justifications,** integrates with ERP, payroll systems or other centralized systems.
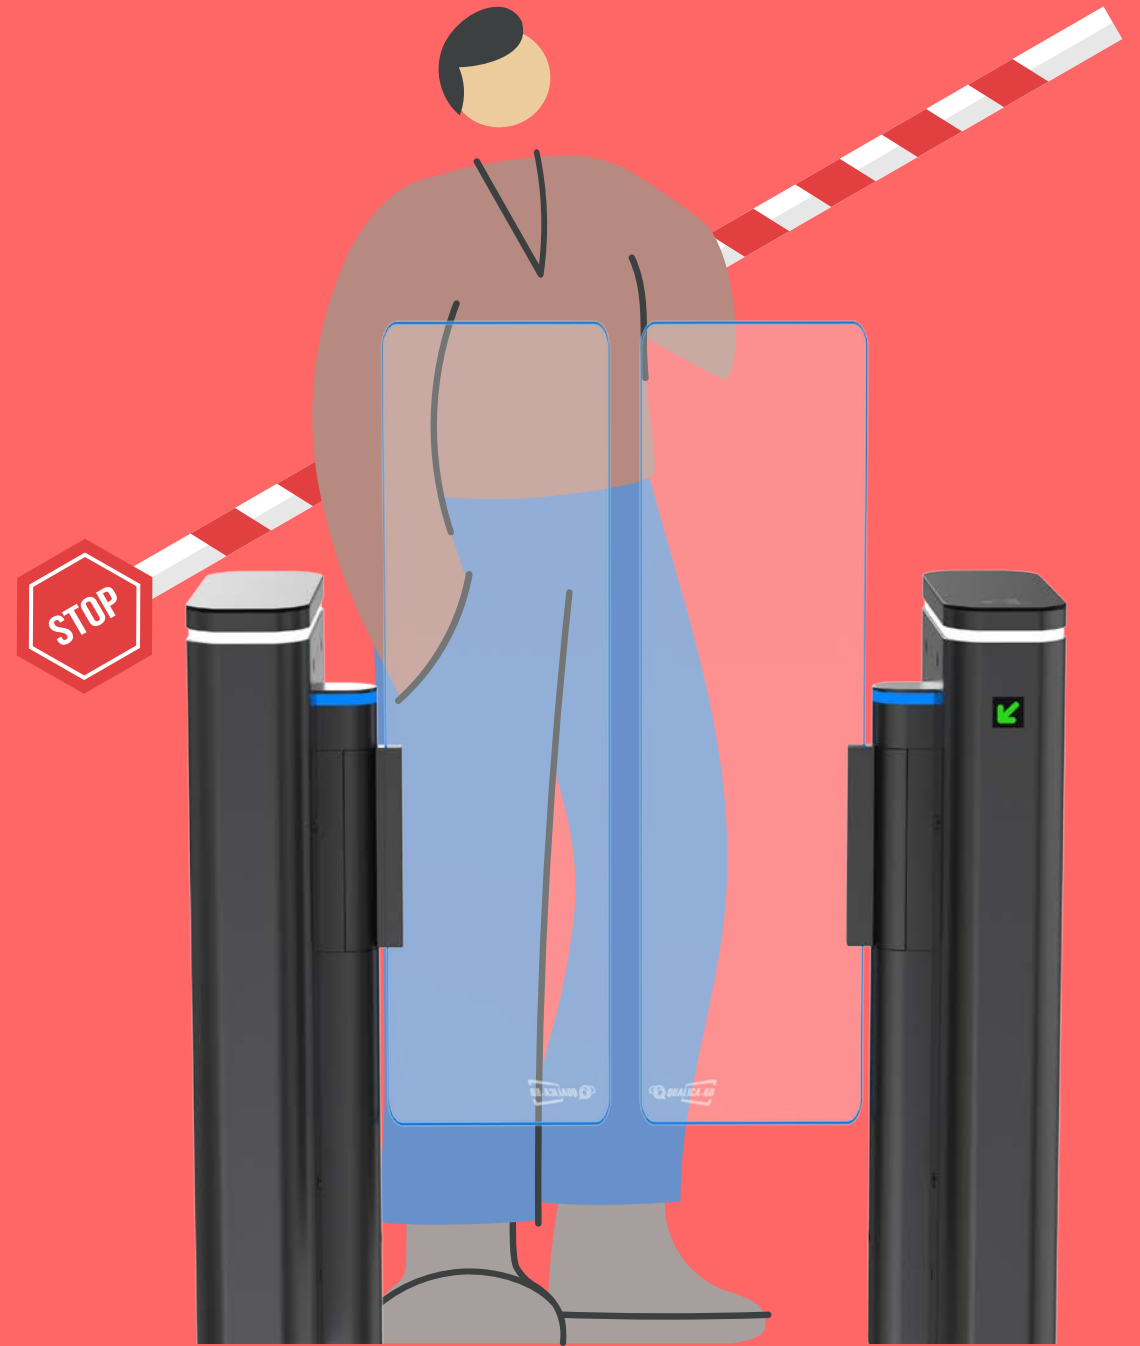

VISITS MODULE

✔ The visits module **records and ensures traceability,** including data such as who is visited and when.

✔ It offers **registration forms, schedule management, time control, visitor notifications, credentials, complete history and detailed report generation.**

ADVANCED ACCESS CONTROL

**INTEGRATION OF OTHER ACCESS CONTROL SYSTEMS**

QRDTIME integrates with **multiple types of terminals,**

such as wall readers, turnstiles, parking barriers and biometric devices.

It offers identification by card, biometrics, QR or PIN, adapting to any company..

Turnstiles, Tripods, Swing Gates...

Physical access control with modern designs and varied finishes.

Parking Barriers

Management of vehicle entry and exit in parking lots.

Biometric Access

Secure identification by fingerprint or facial recognition.
