QRD-Negocios Basic

Application to manage employee Time & Attendance control.

Qualica-RD Negocios Basic is an easy to use software, recommended for less than 50 users, that monitors the time and attendance of your employees. This software allows you to calculate your employees' hours worked for selected periods.

Multiple verification modes (PIN, RFID, fingerprint). Includes photo, private calendar and personal profile. Can view your data online. Allows calendar of special days or events (vacations, sick leave, etc.).

Qualica-RD Negocios Basic also monitors access control. With this application you can define different hours and days of access per employee. All the information generated can be printed but also exported to Excel, Word, PDF and other formats, allowing us to define the different types of reports desired.
